

PV Executive News Summary

- Stay updated about the fast moving worldwide market of the photovoltaic industry.
- The PV Executive News Summary continuously tracks the developments of the PV industry by delivering the most important news on worldwide PV markets every two weeks.

BACKGROUND

Get a picture of most important information

The photovoltaic market is a fast moving worldwide market. As a consequence, decision makers are confronted every day with a flood of information regarding activities of competitors, potential business partners, in addition to the developments in the ever changing worldwide PV markets.

The biweekly news summary is an information service which ensures that every executive manager can remain on the cutting edge of what is going on in this fast-moving industry.

PRODUCT DESCRIPTION

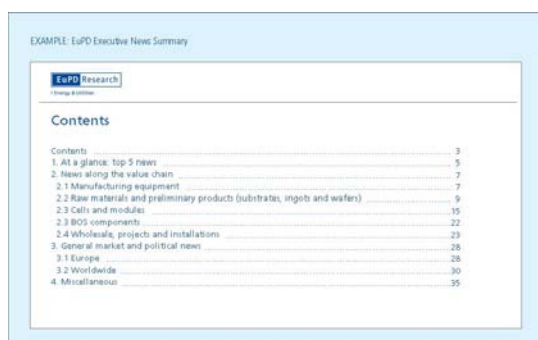

Biweekly overview of the most relevant news

The news summary provides executive summaries of news on the worldwide markets. The objective of the news overview is to deliver up-to-date and comprehensive information regarding the following topics:

- Company news, quarterly reports, news on mergers and collaborations
- News about new products and technological developments
- Information about changing political conditions
- News on markets and research

PRODUCT SERVICES

Product includes the following services:

- Daily monitoring and selection of relevant articles on the PV market in international online platforms, print media and newsletters in English and German
- The top 5 news items from the past two weeks presented at a glance
- Categorization of articles along the value-added chain (identification by icons)
- Creation of a report on a biweekly and monthly basis
- Pre-delivery of important articles
